## Technical Memo T64

Re: 21R02.01 21R02.10

To: Customers of the Combination Wall Clock  
From: The Garrett Wade Technical Department

Our popular Combo Wall Clock now comes with a Celsius scale temperature gauge, rather than the more familiar Fahrenheit scale. The gauge is simple to read using simple conversion materials. The Celsius scale has been commonly adopted throughout the world; the notable exception being the United States, where the older Fahrenheit scale is the popular choice for daily use – weather, cooking and such. Celsius, however, like the metric system, is universally used in the scientific fields throughout the world. Celsius to Fahrenheit conversion follows a basic formula:  $F = (C \times 1.8) + 32$ , but for those of us who'd rather skip the math, we put together the simple conversion chart below.
