Technical Memo T20

Re: 23J03.01 48C02.01 23J03.10

To: Customers of the Foul Weather Kettles
From: Garrett Wade Customer Service

Thank you for ordering one of the Foul Weather Kettles. We hope you enjoy your Kettle as much as we enjoy bringing it to you.

The included instructions are excellent; however, they omit one key point we should bring to your attention:

- The cork stopper should always be **removed** prior to heating the water. The purpose of the stopper is to prevent spillage during transport, and it should never be in place while the Kettle sits over a flame.

We trust you will find the Kettle an ingenious and invaluable tool, especially during stormy weather.
