

## Thank you for your purchase of the German-made Shop Safety Goggles. Please take a moment to review these safety reminders prior to using the Goggles.

**The Shop Safety Goggles** (item 45A04.04) come with clear laminated safety lenses. The lenses are extremely scratch-resistant and shatter proof (EU rating of MG 1 S CE). The safety lenses offer ample protection from airborne debris and small flying objects as can be found in wood and metalworking shops.

**The Welder's Lenses** (item 45A04.06) are Level 5 and are meant for protection against the bright lights/radiation of arc and flame encountered in welding and cutting operations.

**The UV Protection Lenses** (item 45A04.05) are appropriate for protection from bright light sources such as pipe soldering, metal grinding and low intensity flames.

Both the welder's lenses and the UV lenses will provide physical protection against sparks, slag chips and grinding bristles. However, they are not meant for protection from high velocity debris that is thrown by machinery such as saws, power hammers and pneumatic tools. The clear laminated lenses are.

**To Change Between The Various Lenses**, simply unscrew the holding ring on the goggles, place the correct lenses inside the ring, and screw it back on.

The word "inside" is printed on the edge of the laminated safety lens as a guide for how to install them.
